

## NEW! LARVA LACE FLY FINDER

Have you ever dropped a hook on the floor when you are tying flies and spent for what seems like forever trying to find it before your dog or kids end up with it in a foot? Or how about when you get to your favorite fishing hole and you are tying on one of the new flies you tied over the winter and can't wait to try, and you drop it. You can't see it anywhere. I have done both more than once. It is very frustrating. That is why we came up with the Fly Finder. Just wave it over the area you lost your fly or hook and it will pick it up for you. No more wasted time searching!
