

## PHIL CAMERA/MISSOUR RIVER

This years Federation of Fly Fishers took us to Livingston, MT.

We set out early to make a special trip to visit Phil Camera, the original owner of Larva Lace.

Phil had much to share with how the company started out in the early 80's. He is still tying flies at his fly shop in Cascade, MT, just south of Great Falls, MT.

Phil showed us a great 10 mile stretch of the Missouri River, that is a fun float. Sunday we rented a float boat from Phil and floated the 10 mile stretch of the Missouri River that he recommended. What a great float. Beautiful scenery and big trout. If you haven't floated this area I would highly recommend it. Early spring is the best if you want to avoid the weeds which grow heavy by late summer. We had success with both hoppers and the cascade gold which will be next months newsletter.

We are already planning a trip next spring to go back and do some more fishing and a little fly tying with Phil.
